Language	*Spanish*

	☒ Spanish
Type of the material	☐ Guidelines or manuals
	☐ Case or examples
	☒ Training courses
	☐ Others

3. Description

This material consists of an online infographics that provide downloadable information accessed through the Angeles platform or digital portal: Training, development, and talent in cybersecurity, from the National Cryptologic Center.

3.1. Origin:

The National Cryptological Center is the body responsible for responding to the needs set out in Royal Decree 421/2004, of March 12, such as:

Regulations. Develop and disseminate standards, instructions, guides, and recommendations to ensure the security of ICT systems (CCN-STIC Guides).

Training. Train personnel in the Public Sector specializing in the field of security.

Monitoring. Ensure compliance with regulations concerning the protection of classified information within its scope of competence.

3.2. Why is it relevant/important for ESCAPE

This content is very important because it provides a comprehensive overview of cybersecurity, including concepts, how to prevent issues, and how to respond if they occur. Additionally, thanks to the downloadable report format in different languages, it allows users to save the content and refer to it when necessary.
