3. Description

In “Cyber survival game” dovrete affrontare una settimana lavorativa piena di rischi legati alla sicurezza informatica e di tentativi di truffa elettronica.
During the game, participants must defend themselves against cyber risks presented by “threat cards,” which target four aspects of cybersecurity: system protection, information protection, communications protection, and authenticity verification. Players can defend themselves against cyber threats using “power-up” cards, and the player who manages to preserve the most points at the end of the game wins. Through a QR code on each “threat card” and “power-up card,” the game allows players to learn more about the type of electronic scam or cyber threat in question and learn which security aspects are attacked by which type of threat.

4. More information

You can download the game’s guide in 4 different languages (Italian, English, German and French) at the link https://www.cybersurvivalgame.ch/?page_id=860

You can buy the game directly in the association ‘ated - Associazione Ticinese Evoluzione Digitale’ Via Aldesago 139 7974 Aldesago.
