1. Name of the puzzle and description

Cybersecurity awareness Escape Room.

Most people know what phishing is. But few know how it feels to fall for it. Cybersecurity awareness can't just be theoretical. That's why Cyber Crime Game transforms it into an immersive, gamified escape room — where your employees don't just learn about threats, they experience them. Inside this browser-based simulation, players must think like attackers to solve real-world challenges. From phishing and deepfakes to tailgating and CEO fraud, they uncover how small decisions lead to big consequences

2. Classification

Category	Mark if applies
Sector	☐Healthcare
	☒General
Topics covered	☒Cybersecurity
	☐Data protection
Situation type	☐Prevention
	☒Impact (i.e. when it is occurring or has occurred) on patient care.
	☐Impact on all other activities not involving direct patient care.
Language of the original materials	☒Dutch
	☒English

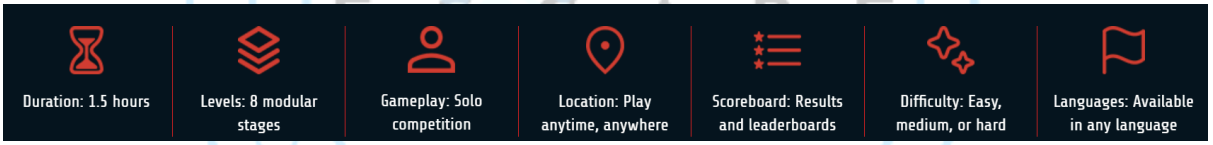
3. Description



Traditional training tells people what not to do. This game shows them why. By simulating social engineering attacks from the inside out, the cybersecurity awareness escape room:

-Creates emotional memory around key risks.
-Builds muscle memory for better responses.
-Uses serious gaming to anchor behavior change.
-Turns abstract policies into real-world practice.

This escape room is based on Cyber Crime Game's proven scenario engine. Participants navigate gamified missions that mirror the tactics of real attackers:
-Social engineering and OSINT research.
-Phishing email analysis and detection.
-Password puzzles & MFA bypass scenarios.
-CEO fraud via audio deepfake.
-Tailgating and physical access.
-Decision-making under time pressure

Browser-based, modular and multilingual. Designed for remote, hybrid and onsite teams. Fully aligned with NIS2 awareness requirements. Backed by behavior analytics and learning reports.
